Covid Safety Plan

Zeteo 2021

1. Capacity of Clipper Magazine stadium is 9,999. With current PA guidelines, we could have a 1000 person outdoor event (10% capacity of a 2,001-10,000 person venue) We are hopeful that by Zeteo these guidelines may shift to 15%.
2. All groups will be physically distant and have reserved seating sufficient distance from other groups.
3. Masks will be required at all times in the stadium premises except when eating. This will be enforced and anyone refusing to wear a mask will be asked to leave. We are aware specific medical conditions exist that may prevent the wearing of a mask. Students or leaders who cannot wear a mask for these reasons will be asked to provide a doctor's note when checking in at the event and keep it with them throughout the event.
4. Students will stay in seats with their group and not mingle with other groups.
5. As of now there will be no open area near the stage for worship as a preventative measure to keep staff and students safely distanced from one another.
6. The doors to the stadium will open at a specific time and stay open so groups won't have to gather or wait to enter.
7. For merchandise, food, and bathrooms there will be designated physically distant lines marked.
8. Bathrooms and highly trafficked areas will be cleaned often during the weekend.
9. Hand sanitizer stations will be accessible and available at multiple points throughout the stadium. Groups are also encouraged to have their own available to use as often as desired.
10. Interactions with the SnL staff will be limited. We are working on creative solutions for our staff to connect with students and leaders while still being safe!
